

EASILY INGEST DATA FROM MULTIPLE SOURCES INTO SNOWFLAKE

“ In our dynamic industry it is essential to deliver continuously updated and analytic-ready data that drives decisions and improves insights. The unique combination of Attunity and Snowflake enables the agility our business demands.”

DALLAS THORNTON, Director of Digital Services at PACCAR

In this age of digital transformation, where real-time insights and decisions are critical, Snowflake customers need easy access to the latest and most accurate data. Qlik solutions offer an end-to-end approach to data and analytics, offering a full breadth of capabilities for the data supply chain - from accessing and integrating all data sources to uncovering and sharing insights. Our open, multi-cloud offerings are unique in that they both accelerate data delivery and allow for open-ended, curiosity-driven data exploration.

DATA INGESTION AND DATA WAREHOUSE AUTOMATION FOR SNOWFLAKE

Attunity, a division of Qlik, is a leader in modern data integration enabling enterprises to employ DataOps for analytics to drive transformative insights for better business outcomes. Attunity’s solutions accelerate the discovery and availability of analytics-ready data by automating real-time data streaming, refinement, cataloging and publishing.

ATTUNITY REPLICATE

Attunity Replicate automates continuous data movement from multiple data sources (Oracle, Microsoft SQL Server, SAP, mainframe and more) to Snowflake with zero downtime. With Attunity Replicate, you avoid the heavy lifting of manually extracting data, transferring via API/script, chopping, staging, and importing.

Attunity Replicate is easy to setup, provides change data capture (CDC) so that you’re always working with real-time data, check mechanisms for data integrity, monitoring, control and auditing for peace of mind, and secure data transfer with industry-standard SSL encryption.

ATTUNITY COMPOSE

Attunity Compose automates the design, implementation and updates of data warehouses and data marts while minimizing the manual, error-prone design processes of data modeling, ETL coding and scripting. Using Attunity Compose, businesses can speed analytics projects, achieve greater agility, reduce risk and fully realize the potential of a Snowflake cloud data warehouse.

WORKING TOGETHER TO HELP YOU GET MORE VALUE FROM DATA

Many solutions make it difficult to amass all your data, enable rapid analytics, and provide those insights across your organization. Snowflake has eliminated these headaches with the only data warehouse built for the cloud. Snowflake delivers the performance, simplicity and concurrency to address the demands of today's data-driven organizations.

ABOUT QLIK

Qlik's vision is a data-literate world, one where everyone can use data to improve decision-making and solve their most challenging problems. Only Qlik offers end-to-end, real-time data integration and analytics solutions that help organizations access and transform all their data into value. Qlik helps companies lead with data to see more deeply into customer behavior, reinvent business processes, discover new revenue streams, and balance risk and reward. Qlik does business in more than 100 countries and serves over 50,000 customers around the world.
